## Technical Skills

### Front-End Development

HTML5  
CSS3  
jQuery/jQueryUI  
HTTP Request/Response  
Ajax  
Twitter Bootstrap  
Angular

### Languages

Python  
JavaScript  
C#

### Databases

SQL (MySQL, SQLite)  
NoSQL (MongoDB)  
Mongoose.js

### Servers

Node.js  
Apache  
IIS

### Frameworks

Express/Socket IO  
Flask/Django  
Nancy/ASP.NET

### Version Control

Git  
Github

### Methodology

OOP  
MVC  
RESTful Architecture

## Full Stack Web Developer

Recently graduated web developer proficient in LAMP, MEAN, and Ruby on RAILS stacks with the ability to develop web applications from scratch. Knowledgeable in SQL and NoSQL ERD diagrams to establish connections between multiple datasets. Experienced in researching, testing, and deployment. Excellent communicator and team player, known for tackling difficult obstacles such as API integration or learning new libraries.

## Education

**Coding Dojo**, June 2015

### Full Stack Web Development Program, Black Belt

Completed intensive 12 weeks, 800 hours of full-time web development program, including the introduction, implementation, and iteration of various web projects over 3 full stacks.

**FreeCodeCamp**, December 2016

### Full Stack Web Development Program Cert initiative.

Completed intensive 12 weeks, 900 hours of full-time web development program, including the introduction, implementation, and iteration of various web projects over various frameworks and the basics.

## Projects

**Mean-Store** Web app that allows users to add a product for sale, and have other users on the web page to place orders on that item, with a search and dashboard of all items for sale on the webpage with a user interface that allows users to see who place an order and what item. This is crafted with a NoSQL database schema along with intricate controllers and models for fully functional app.

*Tech – Mongo, Express, Angular, Node.js, HTML5, CSS3, Twitter Bootstrap, jQuery, Ajax*

**C#-Bid/Auction** Web app that allows users to place a bid, and list items for sale to other users similar to eBay. Created database schema along with intricate controllers and models for fully functional app within 4 hours for the C# belt exam.  
*Tech – C#, ASP.NET CORE, Apache, MySQL, Twitter Bootstrap, HTML5, CSS3, jQuery*

**Python-Wish List** Web app that allows users to post a "wishlist" item on the web for other users to see what wish for, and see what others wish for.. Created database schema along with intricate controllers and models for fully functional app within 4 hours for the Python belt exam.  
*Tech – Python, Django, Apache, MySQL, HTML5, CSS3*
